PROFESSIONAL SUMMARY

With 3 years of experience in software development, I have a strong technical background in backend development especially in Django. I excel in system analysis, design, workflow architecture development, testing, and debugging. I am experienced in working in AGILE/Scrum based development environments, participating in Scrum sessions, Sprint Planning, and Business Requirement gathering sessions. I am highly adaptive and thrive when working with other team members, utilizing my critical thinking skills to analyze business requirements and deliver the most suitable solutions for customer requirements. I am capable of working independently or in a team, and I possess excellent problem-solving, technical, interpersonal, and communication skills.
